MAINTENANCE CORNER

Easy Steps for Dryer Maintenance

1. **Clean the lint screen before every load.**

Before starting each load, remove the lint screen from your dryer, clear away any lint, and place it back securely. This helps maintain proper airflow, improves drying efficiency, and reduces the risk of overheating.

2. **Keep the lint screen area Debris-Free.**

When cleaning the lint screen, also check its housing cavity. Use a dryer lint brush or a vacuum cleaner to remove any trapped lint or debris, ensuring optimal performance.

3. **Avoid overloading the dryer.**

Overloading the dryer extends drying times and puts unnecessary strain on the appliance. For better efficiency and longevity, dry cloths in smaller, manageable loads.

4. **Clean the inside of the dryer.**

Even if stains aren't visible, wipe down the drum monthly to prevent residue build-up Unplug the dryer, then use a soft cloth with soapy water or rubbing alcohol to clean the interior.

5. **Ensure the dryer is level.**

If your dryer shakes or moves during operation, it may be unbalanced. Adjust the leveling feet at the base--turn clockwise to raise--so the dryer sits evenly.

6. **Vacuum Behind and underneath the dryer.**

Lint, dust and moisture can accumulate in hidden areas. Every few months (or as needed) vacuum behind and underneath the dryer to keep it clean and running efficiently.

Read Across America Day - March 2, 2026
